

DataMigration Standards for Windchill - Bug #42

Standard Extraction Layer

04/30/2026 06:11 PM - Olivier Feutseu

Status:	New	Start date:	04/30/2026
Priority:	Normal	Due date:	
Assignee:	Nadine Tseussu	% Done:	0%
Category:		Estimated time:	0:00 hour
Target version:		Spent time:	0:00 hour
Description			
Define a canonical extraction format (CSV / staging tables)			
Create reusable extraction templates for:			
Parts (WTPart-like structure)			
CAD documents (EPMDocument-like structure)			
Documents (WTDocument-like structure)			
File metadata (ApplicationData)			
Include:			
Number, name, version, iteration			
Lifecycle state			
Relationships (parent/child, owner links)			
Ensure data completeness and referential integrity checks
