Description			
Determine which BOMs and BOM lines from ABAS ERP actually need to be migrated into Windchill.			
List of all BOMs (BOM lines) from ABAS ERP			
List of BOMs not existing in Windchill (check cases where the parent article/item does not exist in Windchill)			
List of BOMs already existing in Windchill			
List of BOMs existing in Windchill with ABAS BOM lines missing in the Windchill BOM			
List of BOMs existing in Windchill with Windchill BOM lines missing in the ABAS BOM			
List of BOM lines existing in Windchill with different quantities			
List of BOM lines existing in Windchill with the same quantities			
List of BOM lines existing in Windchill with different UoM (Unit of Measure)			
List of BOM lines existing in Windchill with the same UoM			
List of BOM lines existing in Windchill with different positions/find numbers			
List of BOM lines existing in Windchill with the same positions/find numbers			
Detect duplicate BOM lines within the same parent BOM.			
Detect circular references or recursive BOM structures.			
Identify orphan BOM lines (child exists without valid parent relationship)
